

"I'm truly a lucky person and so is my mother... my mother is 91, and she needs a lot of care, yet functions independently with assistance on her own at home... Honestly, I don't know what each of us would do without them. Our lives would be very different. They're compassionate and take a real family interest in my mother. Her nurse almost treats her like her own.

If there's a problem, she's right on top of it. It's made my life so much easier having them there and knowing that she's being cared for. And my mother is in her own home, where she is happy."

-Daughter of Elant at Fishkill
Home Care client

A Mission OF CARING

Elant is a community-based, not-for-profit organization touching more than 3,000 people every day through our network of facilities, home care agencies and community services. For over 25 years, Elant has been a leading provider of health care and housing services and aims to provide exceptional health care and quality of life through innovative programs to those we serve in our communities. We provide a broad spectrum of services to meet the community's changing needs, and emphasize personalized service and respect for the whole person.

Long Term HOME HEALTH CARE

Long Term

HOME HEALTH CARE PROGRAMS (LTHHCP)

The only program of its kind in Dutchess County, the LTHHCP provides comprehensive care in the comfort and privacy of your own home. The program is open to anyone in the county eligible for care in a residential care facility or nursing home.

Admission is based on the results of a detailed assessment, after which a comprehensive care plan is developed by the primary nurse who coordinates the various services. The program is long-term in that it is designed to help clients stay in their homes for as long as possible.

The LTHHCP is covered by Medicaid, provided that the amount of service needed is within 75 percent of what it would cost to receive care in a local nursing home. Other sources of payment include private pay and Medicare for short term care as applicable.

Rehabilitation

AT HOME

Short-term skilled care for nursing, physical, occupational and speech therapies can be provided in the comfort of your own home. We continue your treatment plan post-discharge from a hospital. Our professional staff will assist you in your rehabilitation and recuperation in your home. We also evaluate your home and make recommendations for any environmental adaptations.

Personalized Case MANAGEMENT

It is said that home is where the heart is. But in Dutchess County, home care can also be where the help is for the elderly or disabled adults in need of daily health care. Elant at Fishkill offers three excellent programs that help individuals remain as independent as possible in the home.

An alternative to residential nursing home care, Elant at Fishkill's programs foster a sense of freedom, individuality and personal dignity. They differ from other programs in that they are uniquely comprehensive and individualized. Each client's care plan is created just for them. The plan considers the medical, social, psychological and environmental aspects of his or her situation. To maximize care, family and support systems play an important role in designing the plan. Personalized case management is the primary focus of each Elant at Fishkill program.
